**Subject:** **Steelwork is excellent - well done Steelpencil**

All,

I inspected the Pool Hall rafters today, and have to say - Steelpencil has done a brilliant job & deserves congratulation.

The steel has come together beautifully, and the pool hall rafters look wonderful. The conceptual workshopping and confluence of talent in realizing these exposed elements is on display for all to see.

I know that Steelpencil, led by Andrew, have worked out and coordinated the architectural and structural intent beyond what would normally be expected, particularly in tricky areas like the ramp between the Admin and Pod building, and the Pod curved facades. The result reflects the effort with the elements coming together perfectly.

On behalf of Arup I'd like to congratulate Steelpencil on their superb efforts and I'd like to say we are grateful for all the hard work & attention to detail that has gone in, a compliment that is equally deserved by Cox, HY and the other consultants. I think the job is coming together very nicely, and the finishes are looking pretty flash.

With the scene set, I'm sure the remainder of the job will be completed with equal vigour and quality of workmanship.

Anyway - the site inspection report is attached, with as usual, very few comments on items that require attention.

Cheers,  
Ashley
